Capabilities

In-house, cloud-based, managed or hosted. It's your choice

Managed IT Services

Let our team take care of day-to-day IT operations, so your team can get on with business. Wherever your infrastructure resides, we can manage some, or all of the day-to-day IT operations, or deliver project specific design and implementation services providing you with peak system performance and availability.

Hosting or In-House

We have over 30 years experience in installation and integration of the right solutions or we can host your infrastructure in our Australian-based data centres with 24 x 7 support. Available infrastructure includes IBM Power, Intel, and SAN storage.

Disaster Recovery / High Availability

OneTeamIT can provide a number of options including placing your backup systems in our data centre, sharing our systems and infrastructure environment, or employing a fully dedicated or shared alternate system to provide real time backup or data and transactions.

EDI / B2B

Whether you are connecting with suppliers, or customers we have years of implementing EDI, Web Service, ESB, B2B and B2C allowing you to trade efficiently, reliably and securely.

Infrastructure as as Service & Cloud

Delivering secure, on-demand infrastructure and services with pricing certainty and local support. Resources, software and information provided on-demand via Internet-based access to a highly secure computing environment.

Backup as a Service

Contract based Backup to our secure data centre to protect your businesses data assets. Your data stays in Australia hosted on industrial strength IBM equipment.

Maintenance, Subscriptions, & Licenses

OneTeamIT can track all activities related to annuity type products including hardware and software maintenance, licenses and subscriptions to give a holistic picture of warranties, renewals, upgrade paths, minimum terms, and periodic billing. Plus we offer annual reviews for budgeting purposes.

IT Products –
Software Licensing Subscriptions and Hardware

OneTeamIT can quote and supply products from leading IT vendors such as Microsoft, VMWare, Lenovo, IBM, HP, Dell and others. Our responsiveness is valued by clients as is our ease of doing business.
